QUASICRYSTAL BANK FOR PARTIALS & DISCREPANCIES

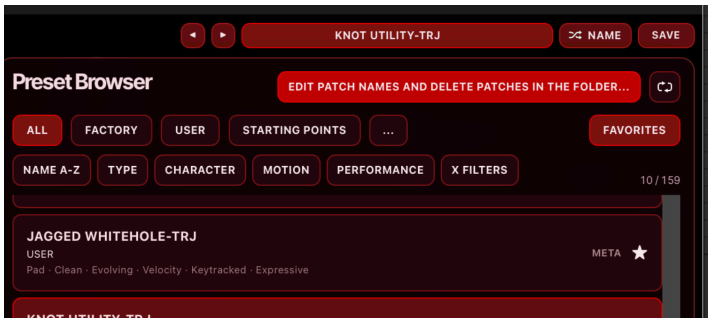

INSTRUCTIONS

It’s quite simple, just long to document :)

1. Extract the « Quasicrystal - Trajectoire.zip » zip file.

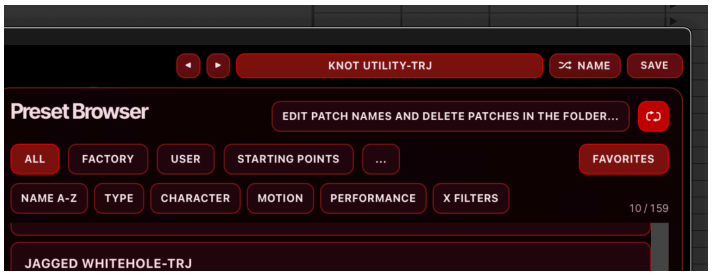

2. Open the plugin (in your DAW) and then its presets browser.
3. Click on the “Edit Patch Names And Delete Patches In The Folder…” button

   This opens the plugin presets folder in your Finder/Explorer.

4. Copy the extracted "Quasicrystal - Trajectoire” folder in the plugin presets folder.
5. Go back to the plugin presets browser.
6. Click on the refresh button (small squarish icon on right) to update the brower for the changes

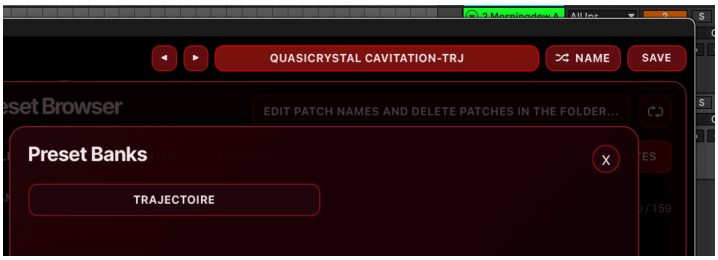

© Trajectoire 2026

7. Click on the three dots next to the Starting Points button
   You should see the Trajectoire bank.

8. Now click on the Trajectoire button
   You should see the presets.
   You obviously can see them with the All button

Have fun with the presets !
